
AZBIO RESOURCE NETWORK MEMBER

PADT Medical helps Arizona inventors, entrepreneurs, and startup companies that need a partner with medical device development and commercialization expertise.

We provide seed stage funding and comprehensive product development support that enables innovators to attract investment capital, achieve FDA approval, and take their concepts to market.

Our customers value our:

- Seed level investment
- Partnership models to enable early stage development
- Office and lab space for incubating early stage companies
- FDA compliant quality and risk management
- Market driven and disciplined design process
- Regulatory & reimbursement support
- Clinical prototype manufacturing
- Design for manufacturing
- Supply chain development
- Manufacturing implementation

PADT Medical is committed to supporting the growth of Arizona-based biotech innovation. Please contact us for more information about our services and partnership models.
